HD/SD-SDI MOBILE VIDEO STUDIO

MS-1000

The Datavideo MS-1000 is a one box solution designed around the SE-1000 6 Channel HD / SD Video Switcher.

The MS-1000 system provides the option to work in Standard Definition or full High Definition.

The MS-1000 features 6 inputs (5 HD/SD SDI and 1 DVI/RGB) with 3 HD/SD SDI and Component (Y:U:V) outputs. RS-422 control, Ethernet connectivity and a built in, 10-bit, 6 Channel Frame Synchronizer that synchronizes all inputs without the need for Genlock (external Genlock synchronization also available).

To assist the producer during any live events, the SE-1000 also features 6 built in HD-SDI to HD-Y:U:V, SD-Y:U:V and Composite format converters, enabling loop through of each input for real time SD monitoring during production.

The MS-1000 is an HD & SD solution for users that require a flexible, but at the same time affordable solution, perfect for, education, places of worship, internet streaming, Conferences and many more applications.

The whole system is fully integrated with the ITC-100 for talkback / intercom, 2 x TLM-433 monitor banks and the TLM-170 main output monitor. The MS-1000 is the ultimate HD & SD Mobile Video Studio, a true one box solution for "Live In Seconds" with easy setup and break down at any location.

SE-1000

FEATURES

Integrated power distribution centre provides a simple and secure solution for connecting power in the studio or in the field from a 12V source, such as a generator.

The MVS range is designed to be ready in seconds any location

An extensive rear panel accessory range ensures easy connection to existing equipment on location or in the studio.

Easy setup, break down and storage.

Standard 19-Inch rack unit for integration with 3rd party products like wireless microphone systems.

Loop through of all camera sources, not just next source and program output, for confident preview of all live sources.

APPLICATIONS

FEATURES

Built in HD Ready TLM-170 pull-out 17" monitor

Tape edit

Integrated Harddrive Recorder/Player

The HS-1000 is integrated with a HDR-200 standard & High definition hard drive recorder/player. After recording simply eject the hard drive carrier and connect to a computer using a universal USB 2.0 connector. Files can immediately be used in most NLE systems or quickly converted to a native format for your system using the provided Datavideo software.

Anti Shock

Anti shock padding protects the equipment during transit.

Securing Panel

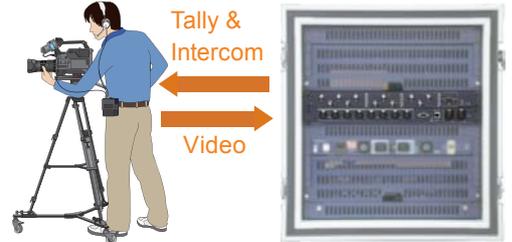

Securing SE-1000 during transport and operation,

Complete Integration

MS-1000 is fully integrated with cable loom and power distribution

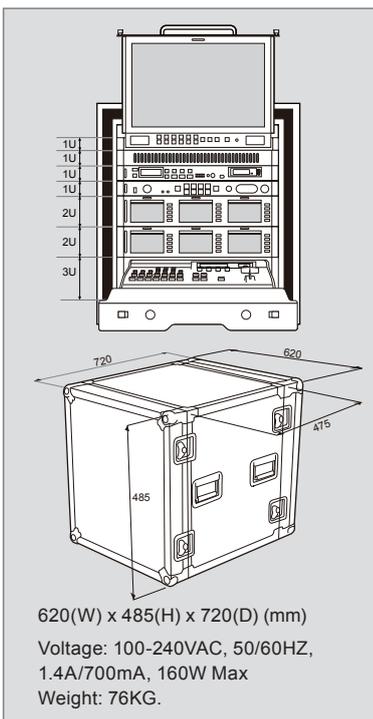

MS-1000 include a 6-channel version of ITC-100 a fully duplex talkback and dual colour tally light system

Transit Lock & Sliding Shelf

Transit lock the SE-1000 to avoid transit damage. Bespoke sliding shelf designed for the SE-1000. Locking feature holds the SE-1000 shelf in a fixed location during production

DIMENSIONS

620(W) x 485(H) x 720(D) (mm)
Voltage: 100-240VAC, 50/60HZ,
1.4A/700mA, 160W Max
Weight: 76KG.

REAR VIEW

RP-21 SDI input & Output

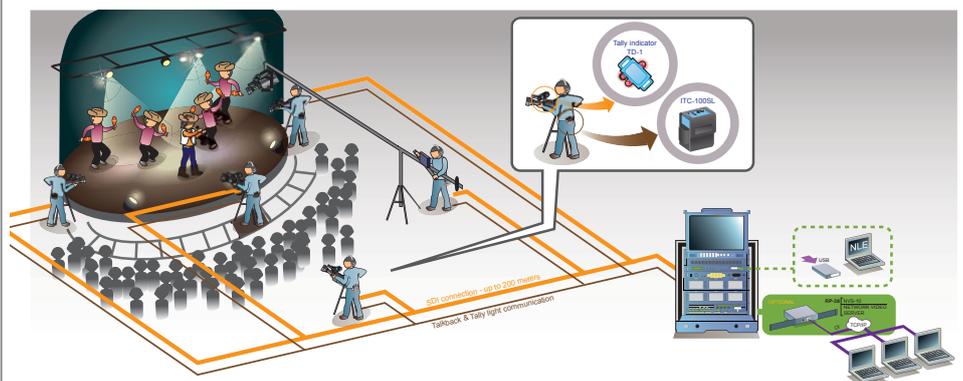

RP-22 Talkback, Tally Light & Balanced Audio Panel

Multi function panel, that allows connection of up to 8 talkback belt packs (ITC-100SL), also included is tallylight and Balanced audio.

PD-1 Power Distribution Center

Dedicated power distribution for all components within the MS-1000. In addition the PD-1 also provides two power outlets. Can be operated from DC as well as AC power.

SETUP DIAGRAM

HD/SD-SDI MOBILE VIDEO STUDIO

HS-1000

The Datavideo HS-1000 is really affordable turnkey solution designed around Datavideo's SE-1000 6-channel HD/SD SDI video switcher. Live events can be very hectic, so to assist in identifying each camera location, and check if cameras have finished focusing or reframing, the HS-1000 has 6 high quality monitors. These provide the producer with a live feed from each of the sources. In addition there is a 17-inch HD monitor, which via picture in picture shows current live (program) and next (source) view.

Communication between the production team is vital, and with HS-1000 integrated ITC-100 eight channel talkback & tally system, the director, cameramen, lighting, green room, floor manager and others can communicate across all channels, or to an individual channel. High S/N ratio makes the communication crisp and clear. The included six TD-1 dual colour tally light indicators, can easily be mounted on the camera, providing both the cameraman and the talent in front of the camera with clear information on which camera is live and "next to go live".

The Datavideo HDR-200 HD/SD SDI recorder, allows you to record the event, or playback pre-recorded footage depending on your chosen configuration. Once you have completed your recording simply eject the hard drive carrier, for easy connection via USB to your editing system.

The integrated PD-1 power distribution centre provides a simple and secure solution for connecting power via a single socket, whether you find yourself in the studio, on location, or even in the field where you can work with a 12V generator or battery.

The HS-1000 is a true 'one box' solution designed for demanding users who need equipment "Live in Seconds". Easy to setup and break-down at any location.

FEATURES

To avoid the mess and inconvenience of individual power supplies, Datavideo HS-1000 comes with an integrated PD-1 power distribution centre. Providing a simple and secure solution for connecting all the integrated equipment from a single socket. Whether you find yourself, in the studio, on location or even in the field where you can work with a 12V generator or battery.

SDI input & Output **RP-21**

Talkback, Tally Light & Balanced Audio Panel **RP-22**

Multi function panel, that allows connection of up to 8 talkback belt packs (ITC-100SL), also included is tallylight and Balanced audio.

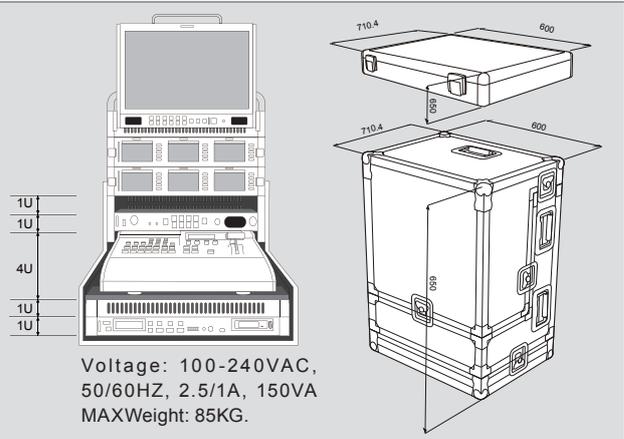

NVS-10(Optional) Network video server **RP-38**

Easy plug and play solution for streaming live audio & video in MPEG-4 format through a Ethernet network.

Power Distribution Center **PD-1**

Dedicated power distribution for all components within the MS-1000. In addition the PD-1 also provides two power outlets. Can be operated from DC as well as AC power.

DIMENSIONS

Voltage: 100-240VAC, 50/60HZ, 2.5/1A, 150VA
MAXWeight: 85KG.

8-channel SD mobile video studio

MS-900

Datavideo MS-900 is a fully integrated mobile video studio designed around Datavideo SE-900 modular 8-channel SD switcher. The MS-900 feature set can be expanded with additional input cards and accessories as your requirements evolve.

The MS-900 accepts up to 8 SD inputs of your choice including DV, SDI, DVI*, YUV and Composite Video. Standard outputs include DV, SDI, YUV, S-Video (Y/C) and Composite Video. Thanks to a built in frame synchroniser and TBC for each channel no external genlock is required for flicker free switching between all 8 inputs - in any format. Optional genlock input card* is available for genlock to existing house reference. The Multi Image Preview output allows all 8 input channels and the PVW and PGM buses to be seen on one screen. The screen also features tally information, the live source is highlighted in Red and the cued source is highlighted in yellow. In addition each input card offers a Composite Video Preview Output, irrespective of the input type.

MS-900 features also include a down

stream keyer (DSK) for integration with character generator such as Datavideo CG-100. Overlay Keying can be performed internally or externally. A separate Logo Display can be used independently of the DSK utilising two built in stores.

An optional Chroma Key board can be fitted to add a 4 channel Chroma Key function. Each channel can be set independently, and you can seamlessly switch from one to another. This is ideal for virtual studio or newsroom type applications.

To accommodate for any delay in DV or SDI equipment SE-900 includes an audio delay function as well as a DV/SDI audio embedder for output. Additionally each DV and SDI video input has an audio de-embedder which provides dual channel balanced audio output.

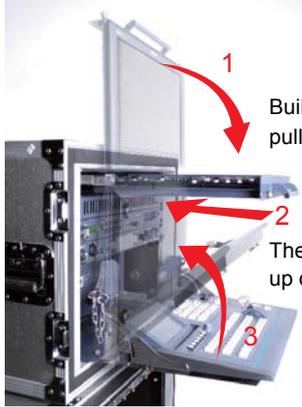

FEATURES

- Complete integrated solution, including 8-channel SD switcher, multi display monitor, hard drive recorder and talk back system with built in tally feature
- Multi-format video – up to 8 inputs with a choice of SDI, DV, DVI*, Component (Y:U:V), S-video (Y/C) & Composite Video
- Balanced audio input with built in delayed function to ensure perfect synchronizing of video
- DV and SDI Input Boards feature audio de-embedder with dual channel balanced audio outputs
- Built in frame synchroniser and TBC for each channel, no external genlock is required for flicker free switching between all 8 inputs - in any format
- Advanced multi-screen monitor for confident preview or each source together with next source/effect preview and program output – with overlaid tally indicator
- Up to 4 live camera input virtual studio with optional Chroma Key card
- Integrated high-capacity removable hard disk video recorders, with 250GB hard drive hard drive, up to 18 hour DV format video
- Integrated Datavideo PD-1 power distribution centre provides a simple and secure solution for connecting power in the studio or in the field from a 12V source, such as a generator
- Easy Setup, breakdown and storage at any location. Designed to be "live-in-seconds"
- Anti shock padding protects the MS-900 during transit.

*DVI Input and External Genlock options will be available in the near future

FEATURES

1 Built in TLM-170 pull-out 17" monitor

2 The Keyboard folds up during transport

3 Transit lock of the SE-900 keyboard to avoid transit damage.

DVI To PPT

SDI Overlay Board enables overlay of text and animations using a Character Generator Software such as Datavideo's CG-100.

Voltage: 100-240VAC, 50/60HZ,
1.6A/770mA, 240W Max
Weight: 68KG.

OPTIONAL BOARDS

Easy installation of optional boards including SDI, DVI, Down Stream Keyer, Genlock in and more

All inputs are synchronised internally, so no genlock is required, even between ordinary consumer camcorders/ players and computer equipment

INCLUDED

External Control Board
RS-232, RS-422 & GPI control interface board allow easy integration with existing equipment that can be controlled such as tape recorders and players or presentation control panels

SDI Overlay Board
A down stream keyer (DSK) board offers both Internal and External keying options. Perfect for integration with character generator hardware/software such as Datavideo CG-100.

Multi-image Preview Output Board
The multi-image output display allows all inputs, master & next source output to be displayed on a single monitor, with superimposed tally and source information to assist the producer in a hectic live production environment.

Analogue and DV - Output Board
Output card for a range of popular video formats including DV (with embedded audio from the audio delay circuit) Composite Video, S-Video (Y/C) and Component (Y:U:V).

OPTIONAL

SDI Input Board
For users who work with SDI. The SDI input board also includes audio de-embedding to a balanced pair. Features a useful Composite Video monitor output, for easy connection to an external preview monitor

Analogue Video - Input Board
For users who require input from a range of popular analogue video formats including Composite Video, S-Video (Y/C) and Component (Y:U:V) – Built in Time Base Corrector synchronises each input - enabling non genlock equipment to be used without glitches. Features a useful Composite Video monitor output, for easy connection to an external preview monitor.

DVI-D & VGA Input Board
Connect a computer and switch between live video and popular computer applications such as presentation and more. Perfect for live events like worship and company presentations.

Features a Composite Video monitor output, for easy connection to an external preview monitor.

DV Input Board
For users who work with Digital Video (DV). The DV input board also de-embeds the audio to a pair of balanced outputs.

Four Channel Chromakey Board
Create a virtual Chromakey video studio with glitch-free switching between up to four video inputs. You can pair four foregrounds (e. g. talent/actor in front of the camera) and backgrounds (like virtual created backgrounds) - the internal Time Base Corrector takes care of synchronizing - even non genlock equipment, like ordinary consumer camcorders can be used.

SDI Output Board
For users who work with SDI. The SDI Output board also features a useful Composite Video monitor output, for easy connection to an external preview monitor.

- SE-800
DV/Analogue
Switcher

At the heart of the MS-800 lies the SE-800 4 channel DV / analogue audio video switcher. The SE-800 allows four channels of digital or analogue video and up to six channels of audio to be mixed / switched.

The whole system is fully integrated with the ITC-100 for talkback / intercom, RMC-140 for next source preview and tally display, TLM-404 for input monitoring and TLM-702 for next source and main output monitoring. Built in DN-500 hard drive recorder for play back or recording.

One box solution for "live in seconds" at any location including Conference, Studio, Outside Broadcast, Internet Streaming facility and many more.

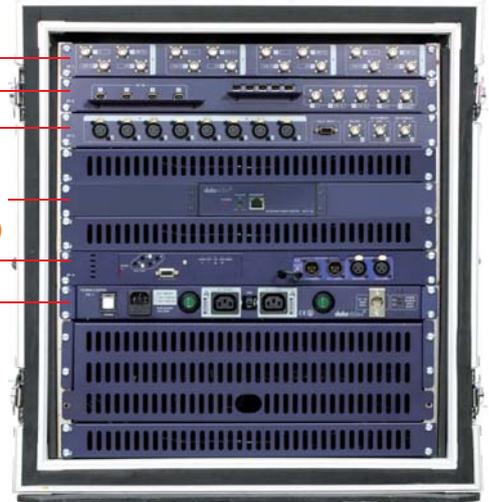

Outputs include: Component (Y.U.V) which could be connected to a DVD recorder or projector, DV which could be connected to a DV Deck and SDI output for live broadcast. The MS-800 also provides a SDI overlay facility allowing broadcast quality titling using Datavideo CG-100 SDI CG software, for example.

1. Built in PD-1 power distribution centre. Power all equipment from a single AC Mains or 12V DC power cable.
2. The transit lock, ensures the equipment is secure while in transport
3. Video connections
 - (1). Industry standard DV25 ensure loss less connection of Digital Video equipment
 - (2). Analogue in/out connections include Component (Y:U:V), S-video (Y/C) and Composite (CV)
4. Easy Setup, break down and storage at any location. Designed to "live-in-seconds"
5. Anti shock padding protects the MS-800 during transit.
6. Standard 19-Inch rack unit for integration with 3rd party products like wireless microphone systems and traditional tape based existing recorders
7. Loop through of all camera sources, not just next source and program output, for confident preview of all live sources

The Datavideo HS-800 is a light one box solution designed around the SE-800 4 channel DV / analogue audio video switcher. The SE-800 allows four channels of digital or analogue video and up to six channels of audio to be mixed / switched.

The whole system is fully integrated with the DN-500 harddrive recorder with removable hard drive carriers, ITC-100 for talkback / intercom, RMC-140 for next source pre-view and tally display, TLM-404 for input monitoring and TLM-702 for next source and main output monitoring.

HS-800 is a one box solution designed to be "live in seconds" at any Conference, Studio, Outside Broadcast or Internet Streaming facility.

REAR VIEW

RP-38(Optional) PD-1 RP-4 SE-800 ITC-100

FEATURES

(1) Built in PD-1 power distribution centre. Eliminates unsightly wall connections and dangling power supplies. Power all equipment from a single AC Mains or 12V DC power cable.

(2) Fully integrated cable loom

2. Video Connections

(1) Input connections include; DV25, Component (Y:U:V), S-Video (Y/C) and Composite Video.

(2) Output connections include;

Component (Y.U.V) which could be connected to a DVD recorder or projector, DV which could be connected to a DV Deck and SDI output for live broadcast.

3. Highly Mobile.

(1) HS-800 is designed to be ready in seconds on any location

(2) Easy Setup, break down and storage

4. Complete Integration

(1) Fully integrated tally and talkback system for up to eight crew members.

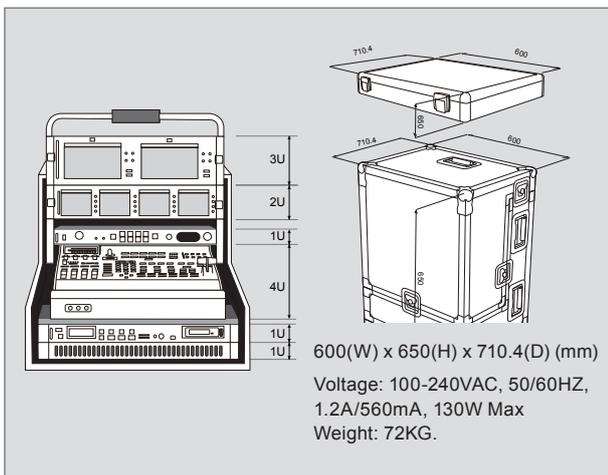

(2) An extensive rear panel accessory range ensures easy connection to existing equipment on location or in the studio.

5. Safety & Warranty

(1) Anti shock padding and transit lock protect the equipment during transport

(2) One supplier to complete the integration and to ensure your warranty

DIMENSIONS

S-Video (Y/C) & CV

MS-500

The Datavideo MS-500 is a one box solution designed around the SE-500 4-channel vision switcher. The MS-500 system is both flexible and affordable, with specifications that can meet any budget or demand, and is perfect for applications within education, places of worship, internet streaming, event & live staging conferences and many more. The whole system is fully integrated with the ITC-100 for talkback / intercom, TLM-702 for SE-500 unique quad preview, next source and main output monitoring. Output options include: Component (Y.U.V) which could be connected to a DVD recorder or projector

REAR VIEW

1 Digital Analogue Switcher SE-500

4-input Y/C (S-Video), Composite Video switcher with unique quad pre-view output, allows display of all 4 sources on a single monitor. On-screen tally light Indication

2 2 x 7" TFT LCD Monitor Bank TLM-702

The TLM-702 utilizes the SE-500 unique quad preview output, allowing users to monitor all 4-input sources on one of the high quality 7" TFT LCD monitors, while displaying the master output on the second 7" TFT LCD monitor.

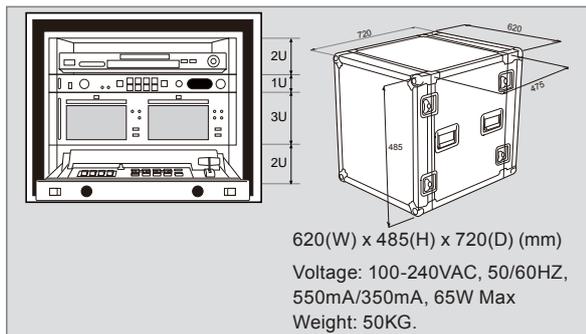

3 Talkback/Intercom ITC-100

Keeping communication open between the Camera crew, the producer, lighting, floor manager etc. is vital in any live production. ITC-100 is a 8 - channel talkback/intercom system that comes supplied complete with 4 x cameraman belt pack with headset/microphone & tally box indicator. Additional belt packs and extension cables available.

4 Rack Shelf

The practical rack shelf allows easy integration of optional DVD, Hard Drive or VCR Recorder/Players

DIMENSIONS

OPTIONAL

1 Talkback & Tally Light Panel RP-17

Multi function panel for connection of up to eight ITC-100SL beltpacks and TB-5 Tally breakout box.

2 Video & Audio Connection Panel RP-18

Multi function video & audio connection panel. Connection for all four Composite Video, two microphone and one AUX audio input. Composite Video & audio output connection. Plus two 12V 4A & one 12V 7A DC output connection for additional equipment.

3 Power Distribution Center PD-1

Dedicated power distribution for all components within the MS-500 in addition PD-1 also provides two power outlets. Can be operated from DC as well as AC power.

OPTIONAL Network Stream Box RP-38

Easy plug and play solution for streaming live audio & video in MPEG-4 format through a Ethernet network. Fully compatible with Windows browser IE 6.0 or above on PC.

S-Video (Y/C) & CV

HS-500

Digital Analogue Switcher SE-500

4 input Y/C(S-Video), CV/SV Video Mixer / Switcher. CV/SV & YUV Output. RS-232/Midi Control. Quad Preview Output display on a single monitor. On-screen Tally Light Indication. Digital effects

2 x 7" TFT LCD Monitor Bank TLM-702

2 x 7" 16:9 Wide Screen Monitors in 19" Rack Mount with 90 degree tilt Auto PAL/NTSC. 2 colour tally light. Individual control for contrast, brightness, colour.

The Datavideo HS-500 is a compact, portable one box solution, built around the SE-500. Designed with no compromise in performance for users where weight matters. Perfect for applications within education, places of worship, internet streaming, event & live staging, conferences and many more. The HS-500 is a fully integrated solution housed in a stylish and light aluminium carrying case, for easy and secure transport and storage. The input connections include Composite Video and Y/C (S-Video), output also includes Component (Y:U:V), which could be connected to a DVD recorder or projector.

FEATURES

Strong Locking Pivot Points:

Easy adjustment of the viewing angle of the high quality TLM-702 TFT LCD monitor.

Ergonomic Design:

The aluminium case has been especially designed to make operation extremely comfortable, and setup / break down very quick

Integrated Solution:

HS-500 is fully integrated with cable loom and power supply. Connection to video sources (such as camcorders) is made easy with the quick release pivoting back panel.

Aluminium Carrying Case:

The HS-500 is a fully integrated solution housed in a stylish and light aluminium carrying case, for easy and secure transport and storage.

DIMENSIONS

Dimensions:

555 X 430 X 155(MM)

Voltage:

100-240V AC,50HZ/60HZ, 535mA/325mA, 37W MAX

MOBILE VIRTUAL STUDIO

MS-DVK1

Virtual Studio or Chroma Key is seen everywhere, from shopping channels, newsrooms, weather forecasts to blockbuster movie special effects. Datavideo MS-DVK1 is the first dual channel virtual studio system, built around the Datavideo DVK-100 Chroma Keyer

MS-DVK1 is a one box solution designed for chromakey & virtual studio, fully integrated with two DVK-100 dual channel chromakeyers, the SE-500 a 4-input Y/C (S-Video), Composite Video switcher, TLM-702 7" TFT LCD monitor bridge for SE-500 unique quad preview, next source and main output monitoring, 2 x DVD players for background footage and DN-500 hard drive recorder.

The whole system is designed for easy setup & break down on location.

FEATURES

- 4-way video camera virtual studio
- One box solution fully integrated with two dual channel chromakeyer, 4-input Video switcher, LCD monitor bridge, two DVD players and hard drive recorder.
- System includes the DN-500 with removable 250 GB hard drive for native recording in DV25 for more than 18 hours
- Anti shock padding protects the equipment during transport
- Built in PD-1 power distribution centre, simple and secure solution for connecting power in a studio or in the field. Can be powered from a single AC Mains or 12V power cable.
- An extensive rear panel accessory range ensures easy connection to video cameras and other equipment
- The MS-DVK1 is easy to setup and designed to be ready in seconds

HD DIGITAL VIDEO SWITCHER

SE-2000

The Datavideo SE-2000 is a rugged and very portable five channel full HD video & audio switcher designed to excel in a new demanding high-definition production environment.

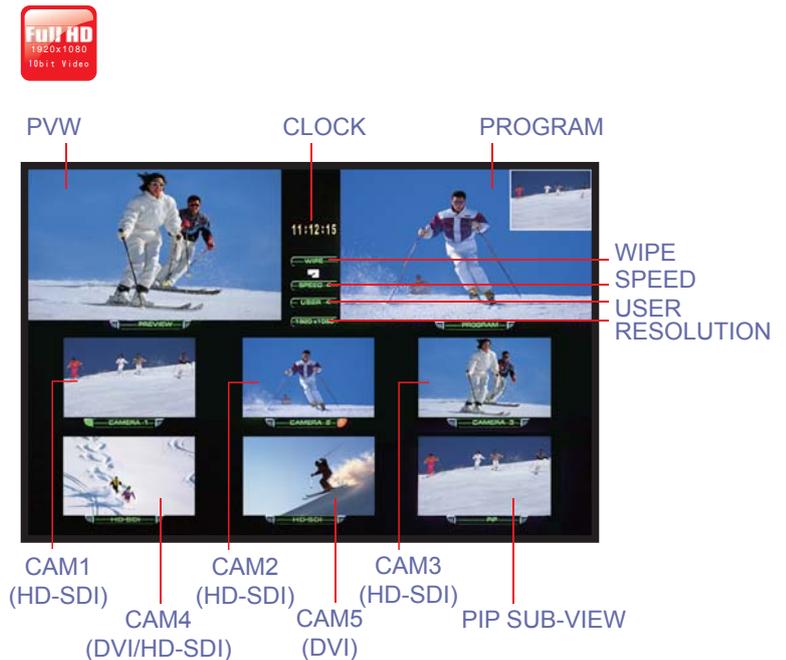

The brand new SE-2000 switcher not only meets your request for true full 1920 x 1080 HD quality, but also provides an array of simple-to-operate features, including up to 14 pre-stored logos, digital clock display, five user setup, DVI-D connection for use with presentation software and easy titling, and many more features.

Whether you're working in worship, education, conducting a live outside broadcast or shooting inside a production studio, the Datavideo SE-2000 full HD video and audio switcher enables you to switch seamlessly between video and audio sources and blend high-quality digital content on the fly, even without external genlock, thanks to the built in TBC.

FEATURES

- FULL HD: 1920X1080i & 1280X720P
- Input:
 - 4x HD-SDI and 1x DVI-D input or 3x HD-SDI, and 2x DVI-D input (Options)
- Output:
 - PGM: Full HD output, HD-SDI and HD-YUV format
 - PVW: DVI-D
- PVW out with multi image and digital clock display
- DVI-D for power point presentation, simple title, support full HD input.
- LOGO insertion, up to 14 logos pre-store and LOGO's resolution is 128x 96
- 4 channel input audio mixers with XLR connectors.
- Audio / video synchronization switching
- LUMA key, real-time simple captions display
- PIP, FRZ, Black image
- 5 individual speed keys for instant selection with take effect
- 5 users preset memory
- Tally signal output
- RS-232 control
- DC 12V input
- 13Transition +border (width, soft and hard)

- 2x DVI connector for DVI-D input
(1x DVI-D input is collective with SDI#4 channel)
- Output: 2x HD-SDI output,
1x HD-YUV output, and 1x DVI-D output
- Program output:
- 2x HD-SDI output, 1x HD-YUV output
- Preview output
- 1x DVI-D output
- Multi image display in PVW output:
- PVW output includes 6x monitoring,
1x PVW and 1x PGM

■ **Audio:**

- 4-CH XLR balanced audio input separate channel,
- 2-CH XLR balanced audio output.
- Switchable Line and MIC mode for input Audio

■ **HD-SDI signal:**

- Complied with SMPTE 292M standard
- Output return loss :
More than 15 dB (5MHz to 750MHz)
More than 10 dB (750MHz to 1.5GHz)
- Output level : 0.8 Vpp ± 10%
- Rise time : Less than 270 ps
- Fall time : Less than 270 ps
- Difference between rise time and fall time within 100 ps
- Alignment jitter : Less than 0.2 UI
- Timing jitter : Less than 1.0 UI
- Eye aperture ratio : More than 90%
- DC offset : 0 ± 0.5V
- Equalizer use 5C-FB cable support 100 meters
- HD-YUV Output:
- Bandwidth 30MHz < +/- 3dB
- S/N Ratio > 50 dB
- DG <3 degree, DP <3%
(Base on U, V signal analyze)
- **Audio:**
- Bandwidth 20~20KHz < +/- 3dB
- S/N Ratio > 70 dB
- THD. < 0.1%
- Support Inter Gen-Lock for the input videos

■ **SE-2000 Unit Dimensions**

- Width: inches/ 429 mm
- Depth: inches/ 330 mm
- Height: inches/ 85 mm
- Net Weight: lbs/ 3.7 Kgs
- Power Supply: 110/220V
- Input: 100-240V, 50-60HZ
- Output: 12V/4A

HD/SD DIGITAL VIDEO SWITCHER

SE-1000

Datavideo SE-1000 is a new compact, high definition and standard definition video switcher ideal for applications within Education, Worship, Live, Music videos, Cable shows, Corporate videos, Event staging and many more.

Datavideo SE-1000 features six inputs (five HD or SD SDI and one DVI-I) and three outputs (three HD or SD SDI), RS-422 control, Ethernet connectivity and a built-in,

10-bit, 6-channel frame synchronizer that adjusts automatically

To assist the producer during any live event SE-1000 also features six built in HD-SDI to HD-YUV, SD-YUV and Composite format converters enabling loop through of each input for real time monitoring during production.

Features also include nine wipe patterns and three directional wipes. Datavideo

SE-1000 will operate in all recognised SD and HD formats enabling integration with existing equipment, while at the same time being future proof. Simple operation and rugged construction allow the SE-1000 to be used in studios, in a Mobile Video Studio, on board an OB truck, in a Post Production facility, in education applications or for any application where a reliable, high quality/low cost video switcher is required.

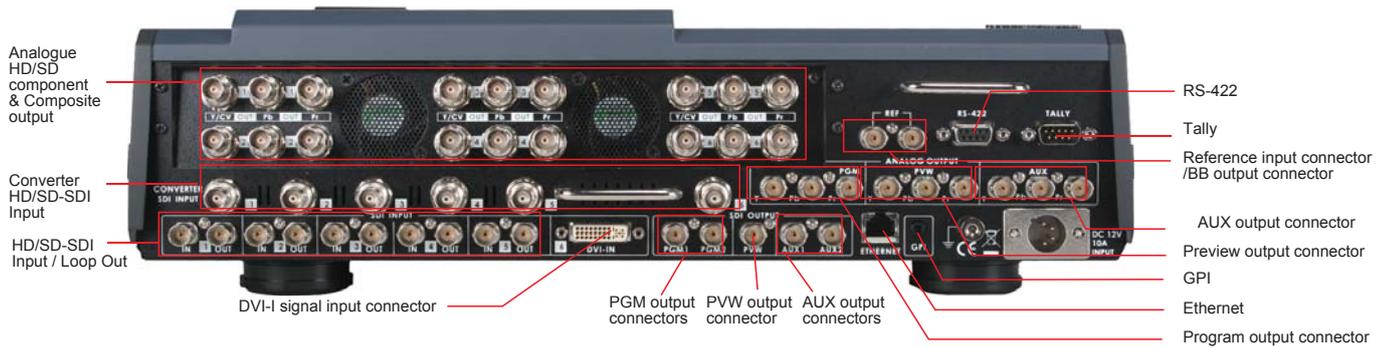

FEATURES

- Multi Format Compatibility
- Worldwide SD and HD formats supported in one unit (Although not mixed formats)
- SD. 480/59.94, 576/50i
- HD. 1080/59.94i, 1080/50i, 720/59.94p, 720/50p
- 6 inputs (5 HD-SDI or SDI, 1 DVI-I)
- 3 SDI output and 3 HD Analogue Component Output
- 10 bit Frame Synchroniser enables switching without glitch or freeze even with asynchronous video signals.
- Multiple Interfaces
- Keying - Both linear and self keying is possible as well as key invert.
- Easy Titling - Versatile titling can be achieved and enhanced by adding Datavideo CG-100 Character generator (SD only).
- 6 tally outputs and an RS-422 interface enable configuration in a wide range of switching options.
- To complete the IT infrastructure the SE-1000 has a built in network interface enabling images and graphics to be added via PC.
- Range of Switching Effects - The unit includes a wide range of simple to operate wipe patterns including nine wipe patterns and three directional wipes.
- 12 volt operation - Built in DC regulator makes this unit ideal for outside broadcast applications, and a perfect companion for Datavideo's Mobile Video Studio Solutions

DIGITAL SD SWITCHER

SE-900

Multi Image Preview Output

Datavideo SE-900 is a modular 8-channel SD switcher with a feature set that may be expanded with additional input cards and accessories. The two piece unit consists of a 19-inch rack mountable main frame, that holds up to 8 input cards, and a control panel. The modular switcher accepts a mix of 8 SD input of your choice including DV, SDI, DVI, YUV and Composite Video. Standard outputs

include DV, SDI, YUV, S-Video (Y/C) and Composite Video. SE-900 features a built in frame synchroniser and TBC for each channel for flicker free switching between all 8 inputs - in any format. Optional genlock input card is available for genlock to existing house reference. The preview output includes both next source and next effect, enabling the producer to preview any effects in

confidence before "going live" SE-900 features a down stream keyer for easy integration with a character generator system. Such as Data-video CG-100. To accommodate for any delay in DV or SDI equipment SE-900 includes an audio delay function as well as a DV/SDI audio embedder.

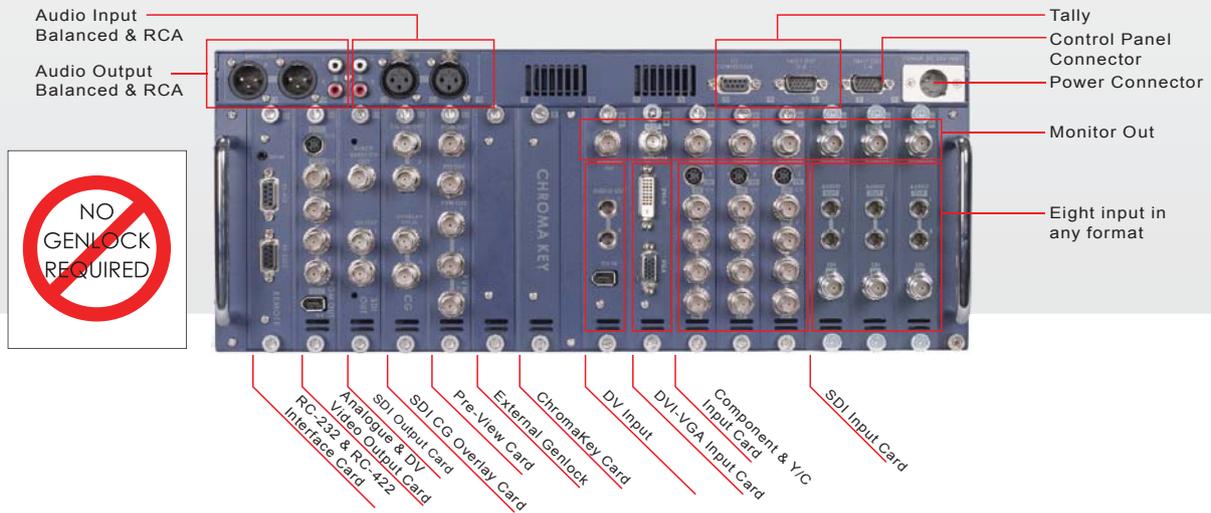

FEATURES

- Up to 8 inputs available for any format including SDI, DV, DVI, YUV, Composite Video
- Outputs include SDI, DV, YUV, S-Video (Y/C) & Composite Video
- Multi image preview panel allows the producer to monitor all live sources (up to 8 input) as well as Program & Next source
- Easy adjustable audio delay for perfect video/audio sync with DV & SDI sources
- SDI Audio embedder • Audio input & output includes RCA (phono) and balanced audio via XLR
- Optional dual chromakeyer, where each keyer can accept two foreground inputs and two background inputs.
- Picture in Picture
- Tally output
- GPI & RS-232 control interface for integration with existing equipment
- SDI Graphics overlay interface for optimal quality of character generator software such as Datavideo CG-100
- No genlock is required for flicker free switching thanks to the built in frame synchronisers and TBCs

CONTROL PANEL VIEW

4 DV | Y:U:V | Y/C & Composite Video Switcher

SE-800

FEATURES

Datavideo SE-800 is a four channel audio and video switcher where producers can combine a mix of different SD formats including DV25 (Firewire), Component (Y:U:V), S-Video (Y/C) and Composite video and stereo audio connections (In and Out). Analogue and Digital Inputs can be used in any combination together. SE-800 provides a combination of

DV25 (Firewire), Component (Y:U:V), S-Video (Y/C) Composite video, as well as SDI output. The SE-800 provides a standard Composite Video loop out on each channel, enabling the producer to monitor each input source. SDI overlay is built in for Character Generator Datavideo's CG-100 CG software. 6 Channel stereo mixer with advanced audio delay feature

for perfect synchronising between video & audio. Dual channel TBC and 4:2:2 frame synchroniser ensure no genlock is required for flicker free switching or mixing, even with different video formats, e.g. Composite Video and DV Ideal for TV Studios, Outside Broadcast, Conference, Worship and Web Casting applications.

LCD MONITOR HOLDER (OPTIONAL)

FEATURES

FRONT

Audio delay

Adjustable audio delay, for frame accurate and perfect synchronising between video and external audio

Joystick

Control white balance, picture in picture or Mosaic on screen location. All settings are saved on power off.

Audio Mixer

6 Channel stereo mixer for mixing the video audio with house audio or AUX inputs (e.g. CD, MD, DAT) or Microphone

Effect transitions

50+ Digital effects including Fades, Wipe, Dissolves, Zooms etc.

Input Selector

Main and Sub bus selector. Cut direct between sources via the main bus

Colour Processor

Brightness, Contrast & Colour setting. Active with power off memory for each channel

Preset keys

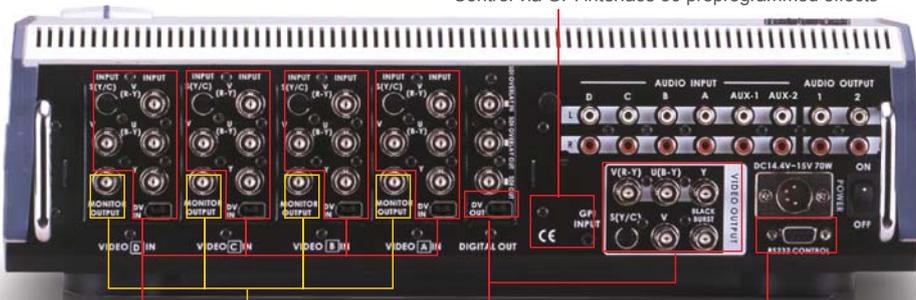

30 quick selection keys for preset event & effects, make it easy to pre-program special frequently used effects

REAR VIEW SE-800DV

GPI Interface

Control via GPI interface 30 preprogrammed effects

Video Input

Four video signal, each with option for DV25, Component Y:U:V, S-Video (Y/C) and Composite Video

Monitor Output

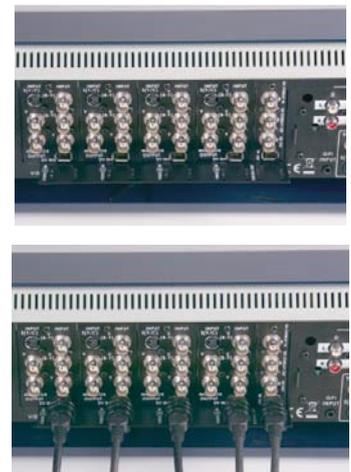

Each input is looped through to a Composite Video monitor to assist the producer

Video Output

Simultaneous output of SDI, Component Y:U:V, DV25, S-Video (Y/C) & Composite Video

RS-232 Interface

Connect Datavideo's external control boxes (RMC-90, RMC140 & RMC-120). Control protocol available online for connection to presentation software or integration controllers.

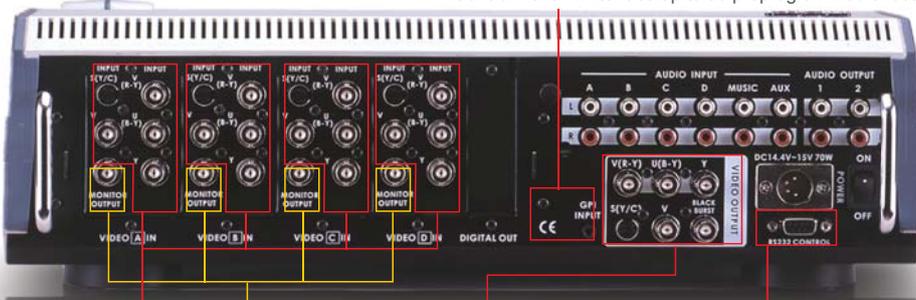

DV Input

SE-800DV provides users with four DV25 input via powered FireWire connector. DV25 provides optimal picture quality while at the same time easy installation and no quality loss using long cabling

REAR VIEW SE-800AV

GPI Interface

Control via GPI interface up to 30 preprogrammed effects.

Video Input

Four video signal, each with option for Component Y:U:V, S-Video (Y/C) and Composite Video

Monitor Output

Each input is looped through to a Composite Video monitor to assist the producer

Video Output

Simultaneous output of Component Y:U:V, S-Video (Y/C) & Composite Video

RS-232 Interfaces

Connect Datavideo's external control boxes (RMC-90, RMC140 & RMC-120). Control protocol available online for connection to presentation software or integration controllers.

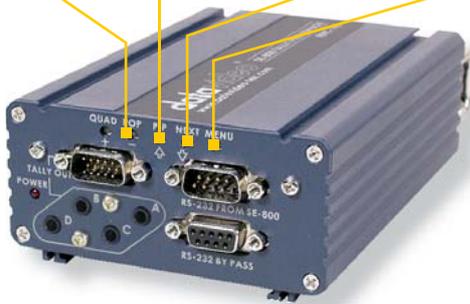

NO Genlock Required

No Genlock is required thanks to SE-800's built in dual channel TBC and 4:2:2 frame synchroniser ensuring flicker free switching or mixing, even with different video formats, e.g. Composite Video and DV

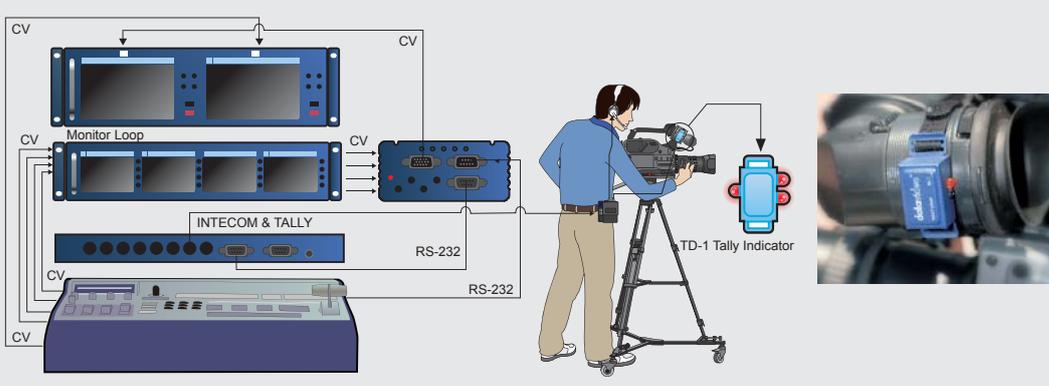

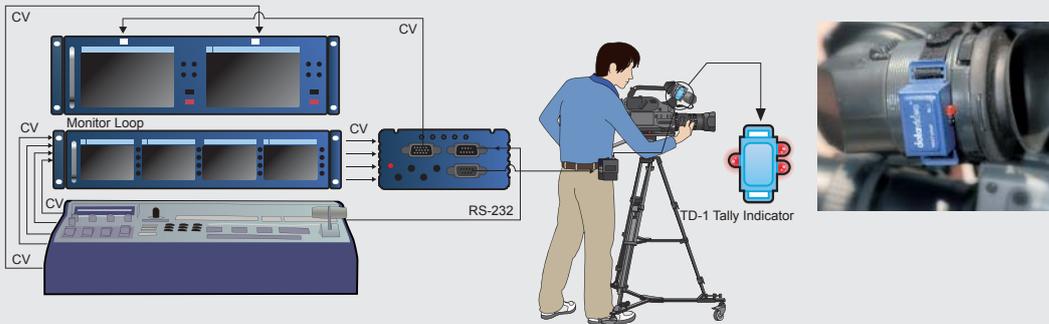

ACCESSORIES (OPTIONAL)

Next Source/Tally Box RMC-140

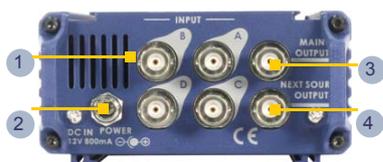

Designed specifically for the SE-800, the RMC-140 provides four different combinations of preview that include Quad, POP, POP, PIP and Next. It provides 15 pin and 4 x 3.5mm tally light outputs. With Datavideo 50 metre tally cable (CB-1) and tally adapter (TD-1), you can easily supply tally information to the camera crew, even with general DV camcorders

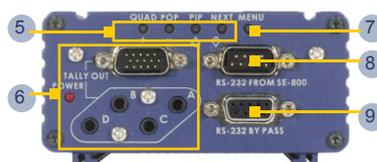

APPLICATIONS

OVERVIEW

- 1 4 x Composite Video Input
- 2 Power (DC12V)
- 3 Monitor output (Quad,POP,PIP,and Next)
- 4 Full Screen preview with tally indication

- 5 Output option selector (Quad,POP,PIP,and Next)
- 6 Tally light output (15pin & 3.5mm jack)
- 7 Menu selector
- 8 RS-232 control input.
- 9 RS-232 control output

ACCESSORIES (OPTIONAL)

**Ethernet remote controller
RMC-120**

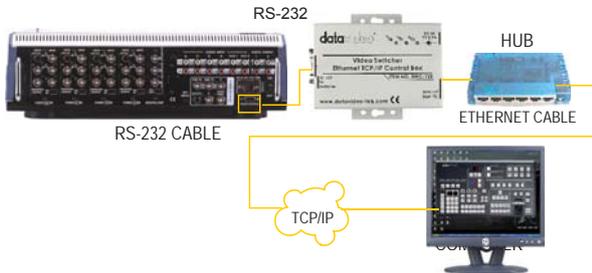

SYSTEM REQUIREMENTS

- CPU: Pentium 4, 2.4GHz
- RAM: 512MB RAM
- Screen Resolution: 1024x768
- OS: Windows XP

PC/Network control box allows full control of SE-800 via Datavideo's free software (Available online via our website)

APPLICATION

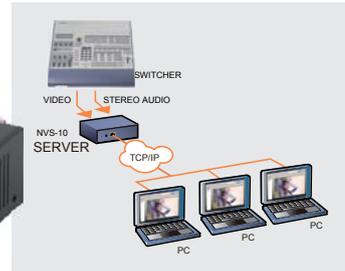

REMOTE CONTROL SOFTWARE

Connect The SE-800 direct to a RS-232 port or a Ethernet port on a Computer and control the switcher using special computer software

SE-500 Quad Screen

Superimposed tally & Next effect indicator

Transition effects display

The SE-500 uniquely display all four input sources via a single quad output

The Datavideo SE-500 is a compact and light weight, four channel analogue input, digital processing video switcher with S-Video (Y/C) and Composite Video inputs. In addition to S-Video and Composite Video, the SE-500 also provides Component (Y:U:V) output. The SE-500 is ideal for applications within Education, Seminars, Small Studios, Clubs, Pubs and many more. The SE-500 uniquely display all four input sources via a single Quad Output, including a superimposed tally indicator on each input, meaning you only need two video monitors - one for all four inputs, one for output. The input display will automatically change to preview the next transition. Features include Dissolve, Fade, Wipes, Splits, PiP and Colour Processor. Channels are internally synced via a built in dual Channel TBC 4:2:2 frame synchroniser. The SE-500 can be manually operated or controlled via RS-232 & MIDI interface. Using Datavideo DAC-6 (DV to Composite, Y/C & Component Y:U:V converter) VP-314 (DV Repeater), and 10 or 20 Meter DV Cable, it allows connection of DV equipment such as DV Camcorders or Tape machines up to 160 meters away.

FEATURES

- Digital Processor, high image quality
- Illuminated control buttons
- T-Bar control of digital video effect transitions
- Four selectable S-Video (Y/C) or Composite video inputs
- Optional Y:U:V via breakout cable
- RS-232 Remote control interface
- MIDI Control interface
- Tally output
- Audio mixer with two Microphone channels and one auxiliary input
- Colour processor for video correction
- Quad video preview monitor output with tally indicators on TV screen
- Digital video effects Split, PiP, Wipe, Fade and Quad display effect

INTERCOM SYSTEM

ITC-100

Good communication is vital in any production studio, keeping communication between the director, cameramen, lighting and control room is essential to produce a polished end result. The Datavideo ITC-100 Intercom system provides 8-Way talkback and tally indicators. The producer can select to talk to an individual channel or to all channels simultaneously.

High S/N ratio makes the communication crisp and clear. The ITC-100 is a standard 19"/1U rack design, so it is easy to integrate into any rack system for using in the field or studio.

FEATURES

- Industry Standard 19"/1U rack design, for easy integration
- Supports 8-Way Intercom (standard package includes 4 sets of ITC-100SL with belt-pack accessories)
- Additional external earphone and microphone interface
- Bi-colour tally light indicator
- Selectable channel talk, broadcast to all or mute.
- Enables clean and vital communication between the camera crew and the director
- Communication distance up to 200 meters
- Supplied complete with Goose-neck Microphone and Light

MC

Headset

ITC-100 comes supplied with four sets of standard Hetset.

MC-1/ LP-1

Light & Microphone

XLR Gooseneck Microphone & XLR Gooseneck Light.

INTERCOM BELTPACK ITC-100SL

REAR VIEW

5 Pin XLR connector provides the belt pack with bi-directional communication, tally signal and power in one cable

TALLY LIGHT INDICATOR TD-1

TD-1 Tally light provides the cameraman as well as the "actor in front of the camera with clear information on live camera and "next to go live" camera

-  Red - Selected as MAIN source
-  Amber Selected as SUB source

AFFORDABLE CHROMAKEY

DVK-100

datavideo

The Datavideo DVK-100 is a two camera live entry level, stand alone Chromakey solution designed for education, small studios, wedding videographers small studios, wedding videographers and smaller production companies.

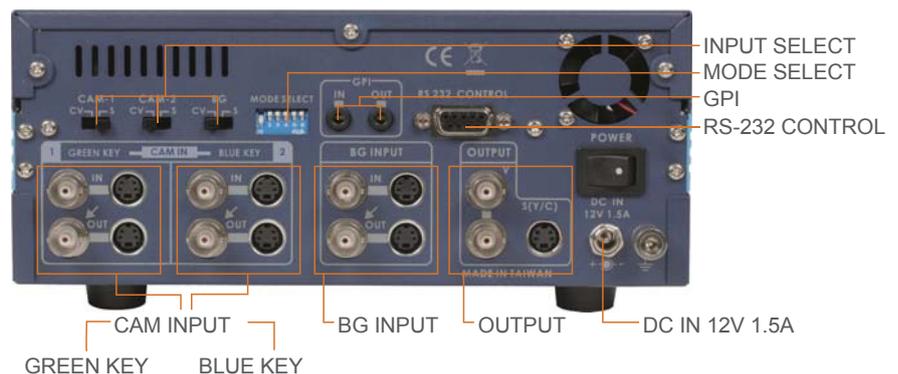

The DVK-100 enables you to create virtual studio effects without spending large sums of money, simply by combining a single colour background (Blue or Green is the best.), two video cameras and proper lighting.

Available to support either PAL or NTSC video standards (separate units), the DVK-100 features three composite and S-Video (Y/C) inputs allowing for dual camera and separate background connectivity.

FEATURES

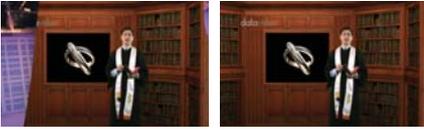

- Two Camcorder inputs for foreground, and one background input
- Key out background colour selectable (Blue, Green or Luminance)
- Key out level adjustable to reduce the shadow after keying
- S (Y/C) and Composite Video input and output
- Window adjustable to fit in different sizes of background screen
- Built in shrink function (reduce white or black colour edge on subject)
- Built in colour processor, brightness, contrast, colour and tint adjustable (tint is NTSC only)
- Built in TBC
- RS-232 interface for control from other RS-232 devices
- Perfect partner for CKL-100 Dual Colour Light Ring & Retro Reflective Cloth (see page 34 & 35)

REAR PANEL

FEATURES

Window Size

The window size can be set to remove any unwanted items from the foreground image. Often your backdrop does not fill the whole screen, particularly if you want your subject to appear small in the finished image. You can use the Up / Down / Left / Right arrows to make the keying window smaller so that only your backdrop is being keyed.

Edge Shrink Functions.

Even with perfect lighting you will occasionally have a subject that still has a dark edge even when you have set the Green Keying and Density Levels correctly. This is why the DVK-100 has Left and Right Edge Shrink functions.

Spill Adjustment

The final setting in any Chromakey is the Spill Adjustment. Often, the green / blue backdrop can cast an unwanted colour cast on the subject. DVK-100 features an advanced Spill Adjustment enabling you to remove this unwanted cast.

Subject Density.

This adjustment will make your subject more or less opaque / transparent; you can use this as a feature in your chroma key where your subject will become more or less defined.

Two Camcorder Input

The DVK-100 has two camera inputs (foreground sources) each of the inputs can be set to S-Video (Y/C) or Composite Video. Switch between the two inputs direct on DVK-100 selector buttons, via GPI or RS-232.

RS232 Remote Interface

The DVK-100 can be fully controlled via RS232

Settings Lock

Once you have set all the parameters of the DVK-100 to produce the perfect effect from both of your cameras you can lock the settings. Once locked none of the DVK-100 front panel controls will respond

SETUP EXAMPLE

DUAL COLOUR CHROMAKEY SYSTEM

CKL-200

LD-1+RF-1225

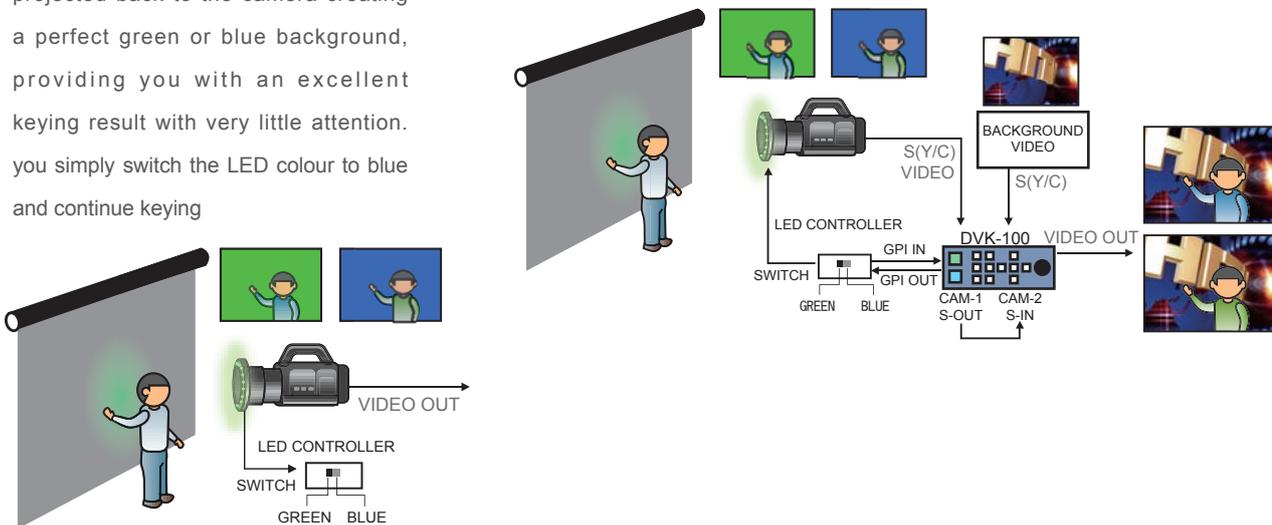

A Chromakey Studio has just become easy and affordable

FEATURES

Datavideo CKL-200 is a combination of a dual colour (green & Blue) LED ring and a unique retro-reflective backdrop cloth, which is embedded with tiny glass beads. The LED light ring is mounted on the lens of the camera, and projects a highly directional green or blue light on the backdrop cloth. Thanks to the embedded glass beads, light is then projected back to the camera creating a perfect green or blue background, providing you with an excellent keying result with very little attention. you simply switch the LED colour to blue and continue keying

- 2 x 1.25m(w) x 2.5m(h) retro-reflective back drop with Velcro on the left and right hand side allowing users to use either one cloth on its own, or join them together to form a single 2.5m x 2.5m background (approx).
- Dual colour Green & Blue LED ring
- Perfect light return up to 75° off axis
- Power Supply with LED brightness adjustment
- Remote control integration with Datavideo DVK-100 (see page 38)
- LED light ring lens size 72 mm
(Additional stepping rings from 52mm to 82mm avail able from your reseller)
- DC 12V operated perfect for mobile applications

Directly copy from Betacam and DV tapes to DVD disc.

Datavideo MP-6000 is a professional quality DVD+RW based DVD recorder with DV in & out plus RS-232 control interface.

The unit incorporates a high performance MPEG-2 codec for real time recording of live audio/video material from camcorders, analogue VCRs, or other analogue or digital sources on to DVD+R/RW disc.

Inputs include: Component (Y:U:V), Composite Video, S-Video (Y/C) and DV25.

The MP-6000 has a heavy duty metal construction making it perfect for demanding applications

The control interface includes RS-232 and GPI for easy integration within existing applications.

FEATURES

- Real Time Stand Alone MPEG-2 Player/ Recorder
- DVD + R / RW Disc Recording
- Variable Bit Rate From 1.7 to 9.1 Mbps
- DV, YUV, S-Video (Y/C), Composite Video Inputs and Outputs
- DV Loop Through
- Large Illuminated Control Panel
- Balanced and Unbalanced Stereo Inputs and Outputs
- Built In Video Processor With Colour Correction
- Audio Level Control
- RS 232 Remote Interface
- Rack Mountable (3U High, 1/2 -19")
- DC 12V Power Supply Included

- Un-Balanced (RCA)
- DV Sampling : 12-Bit 32KHz or 16Bit 48KHz
- Bandwidth : 20-20KHz
- S/N Noise ratio : 65 dB
- Distortion rate : 0.1%

Video Recording Features

- One Touch Recording (OTR)
- Erase Disk (RW disks only)
- Insert Index Point
- Index Menu
- Index Icon Pictures & Text can easily be re-named (English)

Video Play Back Features

- Play / Reverse Play
- Play All / Single Track /
- Play A to B
- Time Search

Control Interface

- RS-232 Feature - Pause, Record, Play, Stop, Rewind & Fast forward
- GPI Feature - Start, Stop and Pause

General specifications

- Width: 8"/205mm
- Height: 5.2"/132mm
- Depth: 9.8"/250mm
- Weight: 3.7Kg
- DC Power: 12V 30W

Accessories

- DVD+RW Disc
- User Manual
- RCA Phono Audio Cable
- BNC TO BNC Video Cable
- FireWire 6-6-pin & 6-4-pin Cable
- 90-240V AC TO DC 12V Power Supply

HD HDD RECORDER

HDR-100

The Datavideo HDR-100 is a hard drive based video recorder & player, with removable hard drive enclosure.

Record from Standard and High Definition video equipment via SDI, Component (Y:U:V) or HDMI, all with a convenient loop through / pass through for monitoring. RS-422 and 232 device control is also utilised.

The HDR-100 provides a choice of recording format, both MPEG-II and HDV (.M2T) which work with a wide range of NLE and play out solutions.

The compact 2U design can be easily integrated with other equipment or can be used as a stand alone recorder/player in the studio or on location.

Once you have completed your recording, simply eject the hard drive carrier, and use USB-2 to connect to a PC or MAC based NLE system, (no extra power supplier required, as USB-2 provides power so its perfect for lap-top use in the field). You can work directly from the removable drive, or copy video files across to the NLE's video drives.

FEATURES

- HD-SDI & HD-YUV Video input
- HD-SDI/HD-YUV/HDMI output
- Embedded HD-SDI / HDMI Video with external audio
- Record format: 40Mbps MPEG2 (8 bit, 4:2:0) M2T. Compatible with most NLE systems.
- Hard drive enclosure include convenient USB 2.0 connector, simply connect to your computer - no power required.
- 2U Height meets to 19" standard rack mount
- Audio monitor function
- Mini XLR Interface, audio balanced input or output
- Support RS-422 and GPI control
- DC IN 12V

You can work directly from the removable drive, or copy video files across to the NLE's video drives.

SPECIFICATIONS

Media format support:

- Photo
- JPEG (.jpg, .jpeg)
- Support photo resolution up to to 5120 x 3840
- Output resolution: 640x480
- Video
- MPEG1 (.mpg, .dat)
- MPEG2 (.mpg, .vob, .avi)

HD HDD RECORDER

HDR-200

The Datavideo HDR-200 is a hard drive based video recorder & player, with removable hard drive encloses. Record from High Definition and Standard Definition video equipment via SDI, Component (Y:U:V) or HDMI, all with a convenient loop through / pass through for monitoring. RS-422 and 232 device control is also utilised.

The HDR-200 provides a choice of recording format, both MPEG-II, and HDV (.M2T) which work with a wide range of NLE and play out solutions.

The compact 1U - 19inch, rack-mountable design can be easily integrated with other equipment on OB trucks, installations, or Datavideo's Mobile Video Studio range.

Once you have completed your recording, simply eject the hard drive carrier, and use USB-2 to connect to a PC or MAC based NLE system, (no extra power supplier required, as USB-2 provides power so it's perfect for lap-top use in the field). You can work directly from the removable drive, or copy video files across to the NLE's video drives.

FEATURES

- HD-SDI & HD-YUV Video input
- HD-SDI/ HD-YUV/ HDMI output
- Embedded HD-SDI / HDMI Video with external audio
- Record format: 40mbps MPEG2 (8 bit, 4:2:0) M2T. Compatible with most NLE systems
- Hard Disc case included USB 2.0 interface to NLE by Computer directly.
- 1U Height meets to 19" standard rack mount
- Audio monitor function
- Mini XLR Interface, audio balanced input or output
- Support RS-422 and GPI control
- DC IN 12V

DN-400

Tapeless, or file based, video acquisition is widely accepted as a replacement for existing tape based systems. Recording times are far longer than traditional tape. With Datavideo's DN-400 video is recorded as files, saving hours of capturing.

The DN-400 comes with a removable hard drive carrier (additional carriers are available). Once you have completed your recording, simply eject the hard drive carrier, and use USB-2 to connect to a PC or MAC based NLE system, (no power supplier required, as USB-2 provides power so its perfect for lap-top

use in the field). You can work directly from the removable drive, or copy video files across to the NLE's video drives.

A wide range of Video & Audio connectors on the DN-400 allow users to connect to analogue video sources (Composite Video, S-Video Component) or DV equipment.

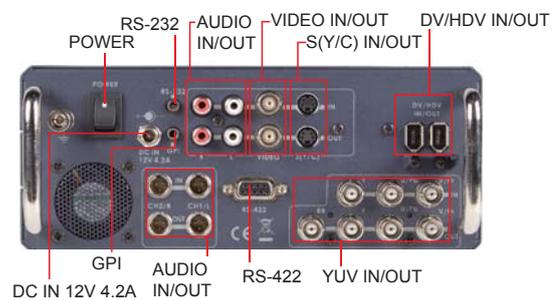

FEATURES

- DV as well as analogue in and out including DV25, Component Y:U:V, S-video (Y/C) and Composite, each input with a convenient loop through for easy integration with existing equipment
- Record direct to a native video format including HDV (.M2T) & DV (.DV) while monitoring on an analogue monitor (DV only).
- Easy to use file conversion utility that allows quickly conversion into a native file format for almost any NLE platform including AVID, MATROX, CANOPUS, Final Cut Pro and many more.
- 2.5-inch hard drive for recording in even the roughest conditions
- Easy connection via standard USB connector to any NLE system
- 2U high with optional 19" rack wings for easy integration into existent equipment or use with Datavideo's mobile video studio solutions.
- Confident Native DV & HDV recording while monitoring on a standard video monitor during recording(DV only).

DV file conversion software

In today's file based video recording, many video file formats are required. Datavideo provide with the DN-400 the FC-01, a software utility enabling users to quickly "wrap" files from one format to another, no conversion but a clever way of making video files native for the most popular NLE systems – or why not share already recorded stock footage between several platform (e.g. .AVI for PC to .MOV for MAC).

FEATURES

Tapeless

- Take advantage of tapeless acquisition in even the roughest conditions
- Record in DV & HDV using the DN-300, and make capturing a thing of the past
- Confident Native DV & HDV recording while monitoring on a standard video monitor during recording (DV only)

Direct to Timeline

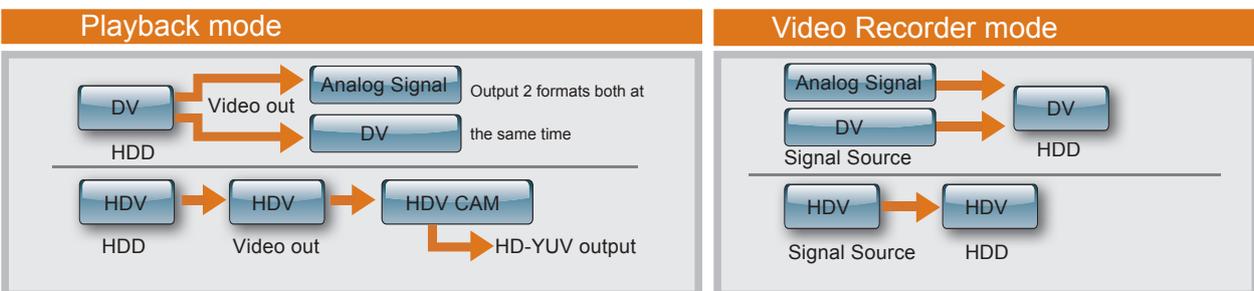

- Compatible with most NLE computer based systems
- Full support for original DV timecode
- Drag and Drop direct to timeline or transfer to the computer in 16 times realtime
- Native file format include: .dv, & M2T

Reduce cost of Tape

- Continuous recording for up to 18-hours without tape
- Record direct to a hard drive without tape
- Connect direct to a computer based editing system via Firewire
- Recorded files can playback to a standard monitor or viewfinder on your camcorder
- Up to 99 track recording for easy navigation and playback
- Seamless repeat loop playback ideal for presentation (e.g. tradeshow or in-shop promotion with instant access to files.)

Tripod Mount Housing

HDMI TO HD/SD-SDI CONVERTER

DAC-9

Many new High Definition camcorders and devices provide HDMI as the only High Definition output option. Datavideo's DAC-9 allows users to connect HDMI devices to professional SDI equipment, like video switchers or recorders up to 200 meters away.

HDMI is not suitable for long cable runs, but a DAC-9 can convert HDMI to High Definition & Standard Definition SDI and take advantage of the high quality, and affordable connectivity that SDI cables offer.

The DAC-9 even embeds the audio from HDMI into the SDI signal so only one single low cost cable is needed.

SDI CG

CG-100

SDI overlay provides the best broadcast quality computer graphics solution, but it has usually been beyond the budgets of smaller studios and production houses - The Datavideo CG-100 changes all that!

The CG-100 software combined with a

Blackmagic Design™ DeckLink Card™ brings you live SDI graphics overlay at an affordable price.

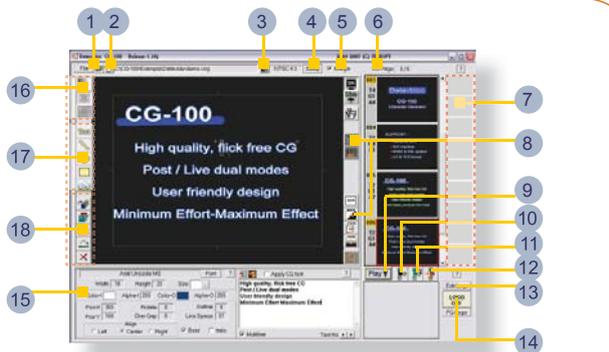

It supports NTSC and PAL video standards and can generate graphics at 16:9 or 4:3 aspect ratios. Pages can be composed and animated on any computer running the CG-100 software prior to the event, provided that the 'dongle' (USB Key) is used. Simply transfer any generated files and the dongle to the live event computer, containing the Black Magic card, and run the sequence.

The CG-100 software is so intuitive that users can easily edit pages during the event.

The CG-100 combines perfectly with many of Datavideo's switchers and Mobile Video Systems, like the SE-800, HS-800, SE-900 and HS-900 to give superb quality graphics / text / logo overlay on live productions. Datavideo CG-100 can also be used with other SDI or YUV input switchers (with DeckLink Studio, DeckLink SDI capture cards).

SYSTEM REQUIREMENTS

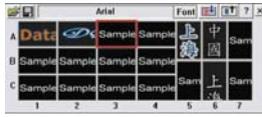

- CPU: Pentium 4 2.0 GHz or higher
- Ram: 1 GB or higher
- Required Min. Disc Space: 15 MB
- Screen Resolution: VGA, XGA
- Network: 10/100 Base T Ethernet card
- OS: Windows XP SP2 (with Direct X 9.0c)
- DeckLinkStudio, DeckLink SDI

FEATURES

- Image objects may be imported as graphics and stored as part of the page.
- Targa Sequence for animation
- Animation objects including wipe, push & fade in various directions at different speeds
- Text can roll and crawl
- Support Windows™ unicode for multi-language input.
- Redo/undo function for quick testing of an animation
- Support 16:9 or 4:3 aspect ratios & NTSC/ PAL video standard.
- Stand-alone logo display function
- Digital Clock Timer
- GPI trigger by external GPI cable or by "Ctrl Key" or "Right Click on the mouse"
- Quick and Simple GUI.
- Live SDI Overlay
- Programmable Multipage Events with Transitions

FEATURES

Text Templates

Text templates can be created to store frequently used text styles

Unicode Support

CG-100 supports multi language input

Multi Line input

Text can be input as multiple lines or imported from .TXT files.

Text & Graphic Editing

Adjustments include Size, Colour, Transparency, Border, Spacing, Position and Alignment

Sequence Play

Pages can be set to run as an automatic sequence

Dongle

The hardware dongle allow users to work during the creative process developing pages pre the event, on an "off location" computer. Install the CG-100 software on several computers and move the hardware dongle from the "off location" to live compute as required.

Live Display

The live button allows pre-edited pages to be displayed live on air while other pages are being edited

Page Animations

Pages can be animated with fade, wipes and pushes

Colour Key

Backgrounds can be removed from imported images by using colour key

Live Stream

Live stream is a bonus application. It converts a Video input, via an IEEE1394 card, into a streamable video (521Kbps or 312Kbps)

GPI Trigger

Pages or sequences can be triggered via simple GPI contact closure, or via keyboard CTRL.

Subtitles

Subtitles can be displayed over graphic lower thirds. Single or dual line tickers can also be easily displayed

Logo Generator

Logo generator mode allows instant control of up to 3 logos, TARGA sequence, crawling text, graphics and static text. Up to 24 pages can be preset

Targa Animation / Import

Animated TARGA (.TGA) sequences such as logos can be imported, sized and positioned

Date/Time/ Stopwatch

Date and time or stopwatch (count up or count down) can be displayed anywhere on the screen, numerous preset layouts are available

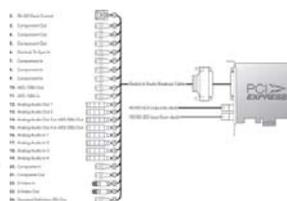

DECKLINK™ CARD

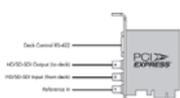

Datavideo CG-100 combine with Blackmagic™ DeckLink Studio, DeckLink SDI to bring you live SDI CG overlay at an affordable price.

FIREWIRE SCAN CONVERTER

PPT-100

Convert your powerpoint program time into DV25 format in realtime

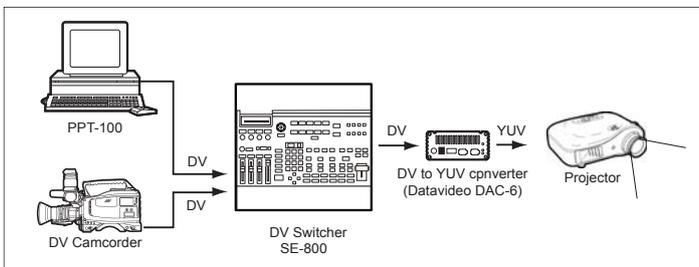

FEATURES

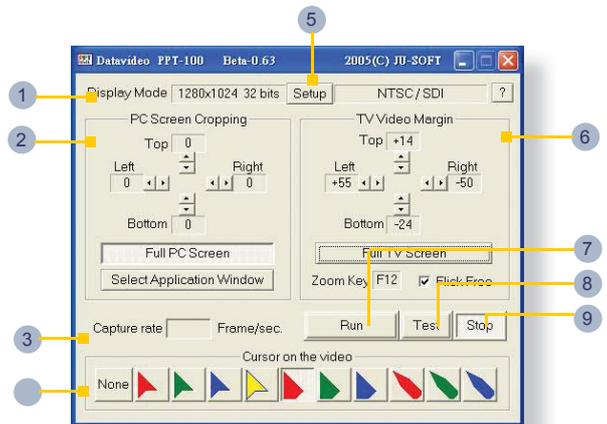

Software that converts your VGA display into a high resolution DV signal that can be output via your PC's DV (Firewire) socket.
 Enables Powerpoint presentations or Excel for example to be recorded to video / DVD or viewed on any TV / Projector.
 Ideal for use with a DV Switcher (such as the SE-800) allowing you to use the computer on one of the switchers DV inputs. The PPT-100 can also take advantage of the Decklink SDI card series. Ideal for Conferences, Schools, Churches, Product Training.
 DV (via IEEE 1394 Interface) or SDI or YUV (via Decklink Card) output.

TFT LCD MONITORS

TLM-170/ 700/ 702/ 433/ 404

As a leading manufacturer Datavideo work closely with LCD panel manufacturers to ensure only the highest quality displays are used, and offer a guarantee against spotlight defects. The high quality professional TLM monitor series automatically switches between PAL / NTSC, and for flexibility can be powered via 12 V DC or AC power.

The Datavideo TLM monitor series is designed for video

professionals that insist on superior performance. After all, every professional knows that you are only as good as the tools you use.

Whether it's in combination with switchers, 19" rack monitoring, in field operation, video editing, or the most advanced multimedia video you're creating, the Datavideo TLM monitor range offers the right tools for your job.

7" ANALOGUE 16:9/4:3

TLM-700

16:9/4:3

FEATURES

- 7" 16:9 Wide Screen Panel
- Resolution: RGB 480X234 dots
- View Angle (V)+50/-40°, (H)+30/-30°
- 2 x Video Input
- Brightness, Contrast, Colour, Tint Adjustable (Tint NTSC only)
- NTSC/PAL Auto Switching
- 16:9 / 4:3 switchable
- Carry Case Included

REAR VIEW

HD·SD

FEATURES

- 7" 16:9 Wide Screen Panel
- View Angle (V)+50/-40°, (H)+30/-30°
- 2 x Video Input
- Brightness, Contrast, Colour, Tint Adjustable (Tint NTSC only)
- NTSC/PAL Auto Switching
- 16:9 / 4:3 switchable
- Carry Case Included

Datavideo TLM-700HD feature a standard V-mount enabling you to power the monitor using a universal battery from a range of manufacturers. Perfect for use in the field.

APPLICATION

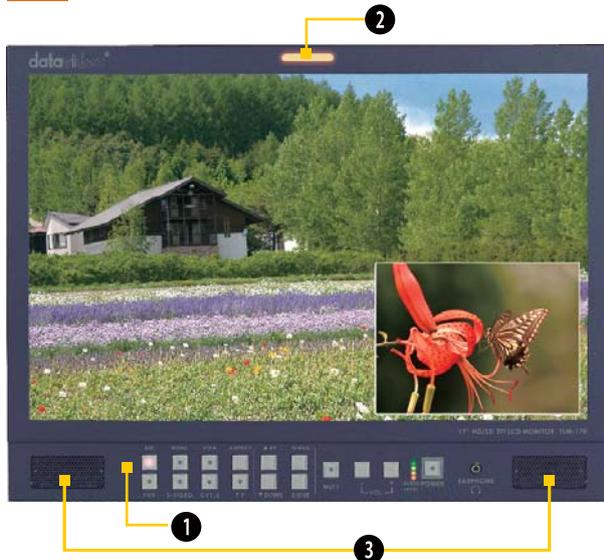

TLM-170

HD-SDI

- TLM-170 Desktop
- TLM-170M 1U rack-mounted pull-out shelf
- TLM-170D HD-SDI Desktop
- TLM-170MD HD-SDI 1U rack-mounted pull-out shelf

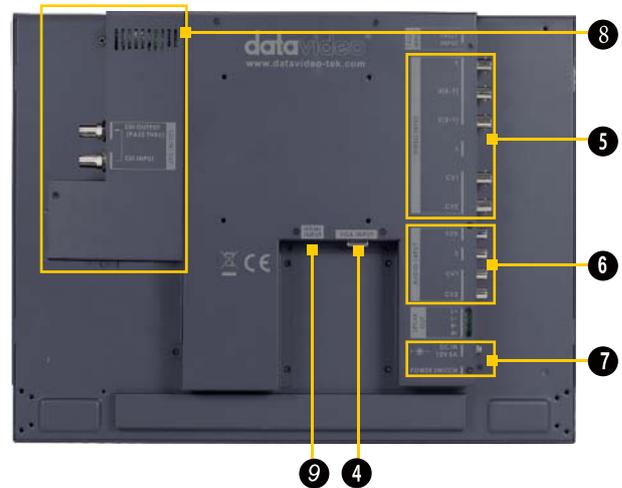

- 17" High Definition TFT LCD monitor
- Display mode adjustable 16:9 / 4:3 & 16:10.
- PAL & NTSC Auto Switching
- Viewing angle: (V) +70 / -70 degrees; (H) +60 / -60 degrees
- Screen resolution 1440 x 900 pixels
- LCD contrast ratio: 700:1
- Composite Video (CV), S-Video (Y/C), SD & HD-YUV and HD & SD-SDI video signal input with SDI loop through output. (Model depending)
- 3 RCA analogue audio input & stereo HDMI input
- Selectable overscan/underscan switchable safe area overlay
- Dual colour tally light input
- Brightness, Contrast, Colour & Tint adjustable (Tint NTSC only)
- Both VGA and HDMI input
- Includes Picture in Picture feature
- Available as a 1U rack-mounted pull-out shelf or Desktop version
- 12v DC operation (Supplied with mains DC adapter)

FRONT VIEW

- 1 Input selector & Image adjustments**
Display mode adjustable include 4:3/16:9 - Auto switching NTSC/PAL and Contrast, Colour, Brightness & Tint (Tint NTSC Only)
- 2 Tally light indicator**
Dual colour tally light indicator ideal for instudio use or as part of Datavideo mobile video studios
- 3 Built-in stereo speakers (2W)**

REAR VIEW

- 4 Computer input**
15-pin D-Sub connector
- 5 Video input**
Two composite video BNC, one component (Y:U:V), one S-Video (Y/C) and one HDMI
- 6 Audio Input**
3 RCA analogue, stereo HDMI and AES/EBU
- 7 DC 12V Power Input**
Easy integration in Datavideo Mobile Video Studio, Supplied with mains DC adapter
- 8 HD-SDI input / output board (optional - model depending)**
- 9 HDMI input**

FEATURES

TLM-170/170D

Desktop

Desktop version of Datavideo's HD ready LCD monitor perfect as high quality reference monitor designed to assist as program monitoring during production. Resolution 1440 x 900 HD/SD SDI, Y:U:V, Y/C and Composite connections. Built in speakers.

Input selector & Image adjustments

Input selector, display mode adjustable include 4:3/16:9 - Auto switching NTSC/PAL and Contrast, Colour, Brightness & Tint (Tint NTSC Only)

Application

TLM-170M/TLM-170MD

1U rack-mounted pull-out shelf

Lock

Secure locking of the folded monitor during transport

Hinge

Pull the monitor out, and fold it in upright position when in use - the strong locking pivot point secure the monitor.

LCD Tray

Mounted in a 1U metal housing, for integration into universal 19" rack or as part of a mobile setup

2 X 7" 16:9/4:3 MONITOR BANK

TLM-702

- 2 x 7" Panel,
19" 3U Rack Mountable
- Screen resolution
RGB 480X234 dots
- View Angle (V)+40/-60°, (H)+60/-60°
- 2 x Composite inputs for each screen with loop through output
- Brightness, Contrast, Colour, Tint Adjustable (Tint NTSC only)
- NTSC/PAL Auto Switching
- Display mode adjustable (16:9 & 4:3)
- 12v DC operation (supplied with mains DC converter)

FEATURES

Image Correction

Adjustable, Colour, Contrast, Brightness & Tint (Tint NTSC only)

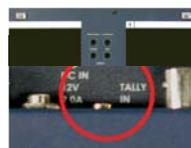

19" - 3U Rack Mountable

Standard 19" 3U rack mountable makes the TLM-702 a great choice for use with Datavideo's mobile video studios, or any installation job

Tally Indicator

3.5 mm Jack connector for tally make the TLM-702 ideal for in studio use or as part of Datavideo mobile studio solutions

Input selector

Input and aspect selector

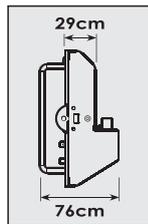

Calibration Screws

Fix the screens at a certain angle, perfect for fixed installations

Slim Design

Robust compact and slim design ensure integration into existing installations

Adjustable View Angle

POWER CENTER

PD-1

UL 60601-1
CAN/CSA C22.2 NO. 601-1
DVD RECORDER
49LJ

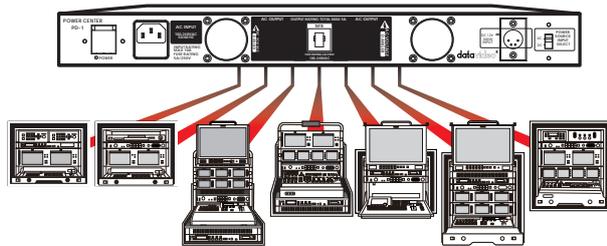

Datavideo PD-1 Power Center is specifically designed to provide a steady power supply for Datavideo Mobile Video Studio applications.

DC 12V with 1 terminal of 12V/5A XLR Output, two terminals of 12V/7A (XLR / 2.1mm In Line) DC Output, 4 terminals of 12V/4A, 2 terminals of 12V/2A and one terminal of 5V/1A DC output., It provides 300Watt rating power supply to cover most of the power requirements for a Mobile Video Studio, such as Video Switcher, Monitoring LCD, Recording VTR / DVD+R, Talk Back system... and so on. With standard 19"/1U Rack size design, the PD-1 makes system integration professional and reliable

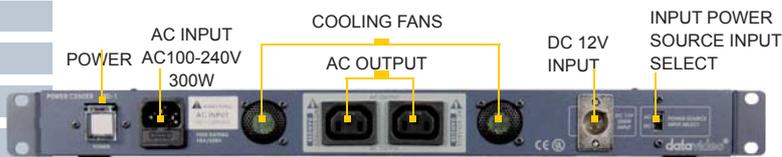

FEATURES

- Power rating up to 300Watts
- Power Indicator and Auto-Recovering fuse protector for each output terminal
- Sequential-Power On of each DC output terminal during power on stage by 1 second duration.
- Three loop thru AC Power outlets.
- Switchable AC 110/220V or DC12V input source. (110 and 220 are separate models)
- Compliant Safety / EMI and RoHS certification

NETWORK VIDEO SERVER

NVS-10

USER INTERFACE

The NVS-10 is a stand alone box for audio/ video streaming through Ethernet in real-time. Designed for live audio/video streaming in the field site the NVS-10 is a plug and play device, simply connect your audio and video signal to the NVS-10, and enjoy video in MPEG-4 format via your Windows browser IE 6.0 or above on PC.

FEATURES

- Composite Video & Balanced/un-balanced audio input
- Both PAL & NTSC compatible
- Video Compression: MPEG-4, SP or ASP
- Real-time Encode in up to 30 fps in full-D1 resolution
- Support dynamic I/P frame ratio compression
- Support Video bit rate up 4Mbps(64K~4Mbps)
- Support audio bit rate up 384Kbps
- Individual setting for brightness, contrast, saturation and hue
- Ethernet port RJ45 Connection to 10/100Mbit
- Ethernet networking
Protocol : TCP/IP, ICMP, HTTP,SMTP,FTP, RTP/RTSP, NTP, UPnP
- Supplied with rich software application
- Embedded Audio Stereo In and Out
- Compatible with Microsoft™ IE 6.0 or Above, operation system : Microsoft™ Windows2000, XP, Vista, External system: DirectX 8.1 or higher

The NVS-10 is also available as a 19" 1U rack unit, perfect for integration with Datavideo Mobile Video Studios or as part of a fixed installation.

NETWORK MEDIA PLAYER

MP-1000

RSS

Datavideo MP-1000 is a versatile digital media player with LAN and Internet connectivity.

Media and settings are stored on its 2 gigabyte solid-state media card, and can be easily updated via a network connection using the built-in Ethernet port. DVD quality content can be scheduled remotely or locally. Support for RSS, enables automatic updated scrolling text, like news bulletins from leading broadcasters, with customizable colours and opacity.

Datavideo MP-1000 supports the more popular media formats, such as JPEG (for slideshows), MPEG 1, 2 and 4, AVI and DIVX movie files and MP3 and WAV sound files.

MP-1000 is rugged and stands up to the rigorous challenges of today's most demanding digital media applications. The compact design also makes MP-1000 ideal for kiosks, display advertising, and other small-footprint installations.

Distributing content to multiple displays and locations has never been easier and more affordable.
